Evaluation of Health Information Technology - Key Elements ...

The use of health IT can improve the quality of care, even as it makes health care more cost effective. AHRQ's health information technology (IT) initiative is part of the Nation's strategy to put information technology to work in health care. The integration of health IT into primary care includes a variety of electronic methods that are used to manage information about people's health and health care, for both individual patients and groups of patients.

Health Information Technology Integration | Agency for ...

viiiIntroduction and objectives of the handbook Introduction and objectives of the handbook The monitoring and evaluation framework shows how health inputs and processes (e.g. health workforce and infrastructure) are reflected in outputs (e.g. interventions and available services) that in turn are reflected in

MONITORING THE BUILDING BLOCKS OF HEALTH SYSTEMS

Health technology assessment (HTA) refers to the the systematic evaluation of properties, effects, and/or impacts of health technology. It is a multidisciplinary process to evaluate the social, economic, organizational and ethical issues of a health intervention or health technology.

WHO | Health technology assessment

Health information technicians document patients' health information, including their medical history, symptoms, examination and test results, treatments, and other information about healthcare services that are provided to patients.
